| $0 \times 10=0$ | $1 \times 10=10$ | $2 \times 10=20$ | $5 \times 10=50$ | $10 \times 10=100$ |

When you reverse the factors, you get the same product. This means that there are only 21 brand new multiplication facts to learn!

| 3 | 4 | 6 | 7 | 8 | 9 |
| :--- | :--- | :--- | :--- | :--- | :---: |
|  |  |  |  |  |  |
| $3 \times 3=9$ | $4 \times 4=16$ | $6 \times 6=36$ | $7 \times 7=49$ | $8 \times 8=64$ | $9 \times 9=81$ |
| $3 \times 4=12$ | $4 \times 6=24$ | $6 \times 7=42$ | $7 \times 8=56$ | $8 \times 9=72$ |  |

Do you know any number times 0 equals 0 ? That means you know all the zeroes.

Do you know any number times 1 equals the other number besides 1? That means you know all the ones.

Do you know how to count by 2, 5 and 10? Skip counting is the same as multiplication. That means you know all the twos, fives, and tens.

Do you know that when you reverse the factors in a multiplication problem, the product stays the same? This means that if you know $2 \times 3=6$, then you also know that $3 \times 2=6$. Once you learn $3 \times 4=12$, then you will also know $4 \times 3=12$, and so on.

This is GREAT NEWS! It means that you only have to learn 21 new facts.

## Only 21 New Facts to Learn

- If you can skip count by 2,5 , and 10 , you already know those multiplication facts. Color in the rows and columns for 2,5 and 10.
- If you understand that any number $\times 0=0$ and any number $\times 1=$ the number besides 1, you already know those multiplication facts. Color in the rows and columns for 0 and 1.
- Now there are 36 facts left on the chart. But if you know that reversing the factors in a multiplication problem still equals the same product, you can color in some of these. For example, once you learn $3 \times 4=12$, then you will know $4 \times 3=12$. Once you learn $3 \times 6=18$, then you will know $6 \times 3=18$. So you can color in $4 \times 3=12,6 \times 3=18,6 \times 4=24,7 \times 3=21$, $7 \times 4=28,7 \times 6=42,8 \times 3=24,8 \times 4=32,8 \times 6=48,8 \times 7=56,9 \times 3=27$, $9 \times 4=36,9 \times 6=54,9 \times 7=63,9 \times 8=72$.
- The 21 new facts left over are the ones you need to concentrate on learning. That's not so hard!
