

Year 2 - Knowledge Organiser: Animals including humans (Healthy Eating)

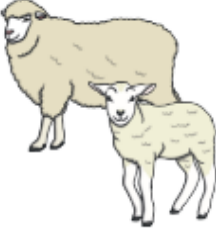

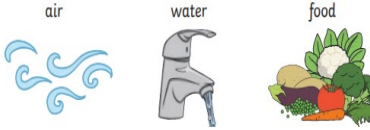

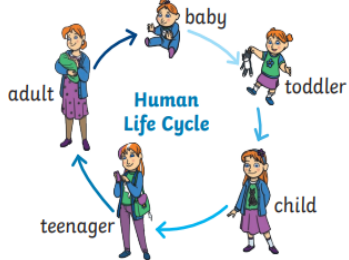

Skills

- Classifying; animals and foods
- Observing over time; a life cycle and changes in their body during exercise
- Researching; adults and their young

Knowledge

- I know all animals have 3 basic needs for survival; water, food, air.
- I know that it is also important for humans and animals to have shelter and be healthy.
- I can explain what happens if basic needs of animals, including humans, are not met.
- I know that animals, including humans, have offspring that grow into adults.
- I know that offspring are very much, but not exactly, like their parents.
- I know that most animal babies need to be fed and cared for by their parents.
- I can describe the life cycle of some animals and humans.
- I can describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene

Essential vocabulary	
reproduction	the process by which living things create young or offspring
child	a young human
heartbeat	a single complete pumping motion of a heart
breathing	the act or process of inhaling and exhaling air
